-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This application discloses and claims only subject matter disclosed in prior Application No. 09/986,067, filed 07 November 2001, and names an inventor or inventors named in the prior application. Accordingly, this application may constitute a continuation or division. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78. The specification does not refer to this earlier application. The only indication that the present application may be a division thereof is on the IDS of 04 August 2003. Because the relation has not yet been established, the present case is not accorded the Foreign Priority claim, nor can the references cited on that IDS, but not submitted, be considered and made of record.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(b) or (e) as being anticipated by Katz *et al.* (US 6,200,704).

This reference is available under §102(b) if the present application is not accorded the filing and priority dates of Serial No. 09/986,067, and under §102(e) if it is accorded those dates. Katz *et al.* disclose a battery comprising a cathode containing FeS₂ (column 6, lines 22-23), an

anode made of a lithium alloy such as Li/Si (column 14, lines 56-57) and a non-aqueous organic electrolyte (column 16, line 48 through column 17, line 8). The battery may be "recycled as a secondary cell" (column 5, lines 1-2), thus being discharged and charged repeatedly.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chu *et al.* (US 6,402,795) disclose lithium alloys and FeS₂ used as "wetting materials" for depositing lithium onto a substrate. Vandayburg *et al.* (US 6,399,246) disclose FeS₂ as a cathode for a primary battery.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Kalafut whose telephone number is 571-272-1286. The examiner can normally be reached on Mon-Fri 8:00 am-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
